

PIP

POWERSOFT™ SERIES FOAM EAR PLUGS

MAXIMUM COMFORT

www.pipusa.com

PowerSoft™
FOAM TECHNOLOGY

It's all about choice.

PIP® offers convenient foam ear plugs designed to provide superior comfort and noise-blocking performance.

PIP® ear plugs feature PowerSoft™ polyurethane foam that fit snugly in any ear canal and deliver all day comfort to ensure employees receive the right fit and protection.

The facts.

- > Ear canals are like fingerprints – unique to everyone.

Foam ear plugs are the most popular choice of hearing protection in the workplace because they are versatile and economical.

- > Recovery time is critical.

Optimal rebound time is critical to achieve a proper acoustic seal in both ear canals. Ear plugs that rebound too fast do not fit consistently in both ears. Ultimately, the worker spends needless time attempting to achieve consistent acoustic seals for both ears.

- > Many don't properly roll-down ear plugs.

The correct use of ear plugs is critical to ensure optimal hearing protection. Improper use can minimize the effectiveness of the hearing protection properties.

CHOOSING THE CORRECT PROTECTION

The key to achieving optimal protection is selecting the ear plug size, shape and style suitable for each worker.

BULLET™

Fits to the natural contour of the ear canal.

FLARE™

Wide base seals out dirt and debris.

T-FIT™

Designed for easy handling, fit and long-term wear.

SoftStar™

Cylinder design is a proven favorite for many workers.

EZ-Twist™

Combines comfort with convenience, hygiene and ease-of-use.

Choices for all workers

Comfort is essential to ensure maximum protection. It is important to consider all features that make one ear plug work differently from another. PIP® makes it easy to compare. By offering advanced shapes, sizes and styles, we are sure to meet your needs.

All workers want:
PROTECTION, COMFORT and EASY FIT.

PowerSoft™ FOAM TECHNOLOGY

PowerSoft™ Foam Technology is a proprietary polyurethane foam formulation that results in ear plugs with optimally-sized cell structures that expand gently and evenly inside the ear canal. This translates to all-day comfort with excellent attenuation.

Getting a proper fit

Foams with small, dense cells may result in:

- > Harder plugs with shorter rebound time
- > More pressure and discomfort in ear canal

Foams with large, airy cells may result in:

- > Uneven roll-down and longer time to fit
- > Longer rebound time

**PIP® EAR PLUGS WITH POWERSOFT™
FOAM TECHNOLOGY DELIVER:**

- > **Optimal rebound**
- > **Maximum all-day comfort**
- > **Perfect fit**

MEGA
BULLET™ PLUS

NRR

**Tapered shape
for easy installation**

- Regular size fits most ear canals
- Easy roll-down for quick insertion
- PowerSoft™ Foam Technology features a proprietary polyurethane formulation that delivers optimal recovery time, easy insertion and maximum all-day comfort
- Shape conforms to most ear canals for increased sound attenuation
- Traceable metal detectable (Blue) style available for use in the food industry
